About DocShipper

DocShipper Group is a global freight forwarder offering core services like Geodis, DSV, DB Schenker, CEVA... So what sets us apart? **We do it better, literally!** That's why we're scaling aggressively in such a competitive industry.

We're shaking up the outdated and opaque international freight industry by replacing rigidity with flexibility and complexity with simplicity. Our goal is simple: **"Redefine the standards of international trade"** through technology, user experience, and AI.

Thanks to our sourcing department, we act as a **360° Digital Supply Chain Assistant**. We offer personalized solutions on a case-by-case basis and ensure first-class purchasing sources and stable logistics (Air, Sea, Rail, and Trucking) for any type of goods.

Our client Platform

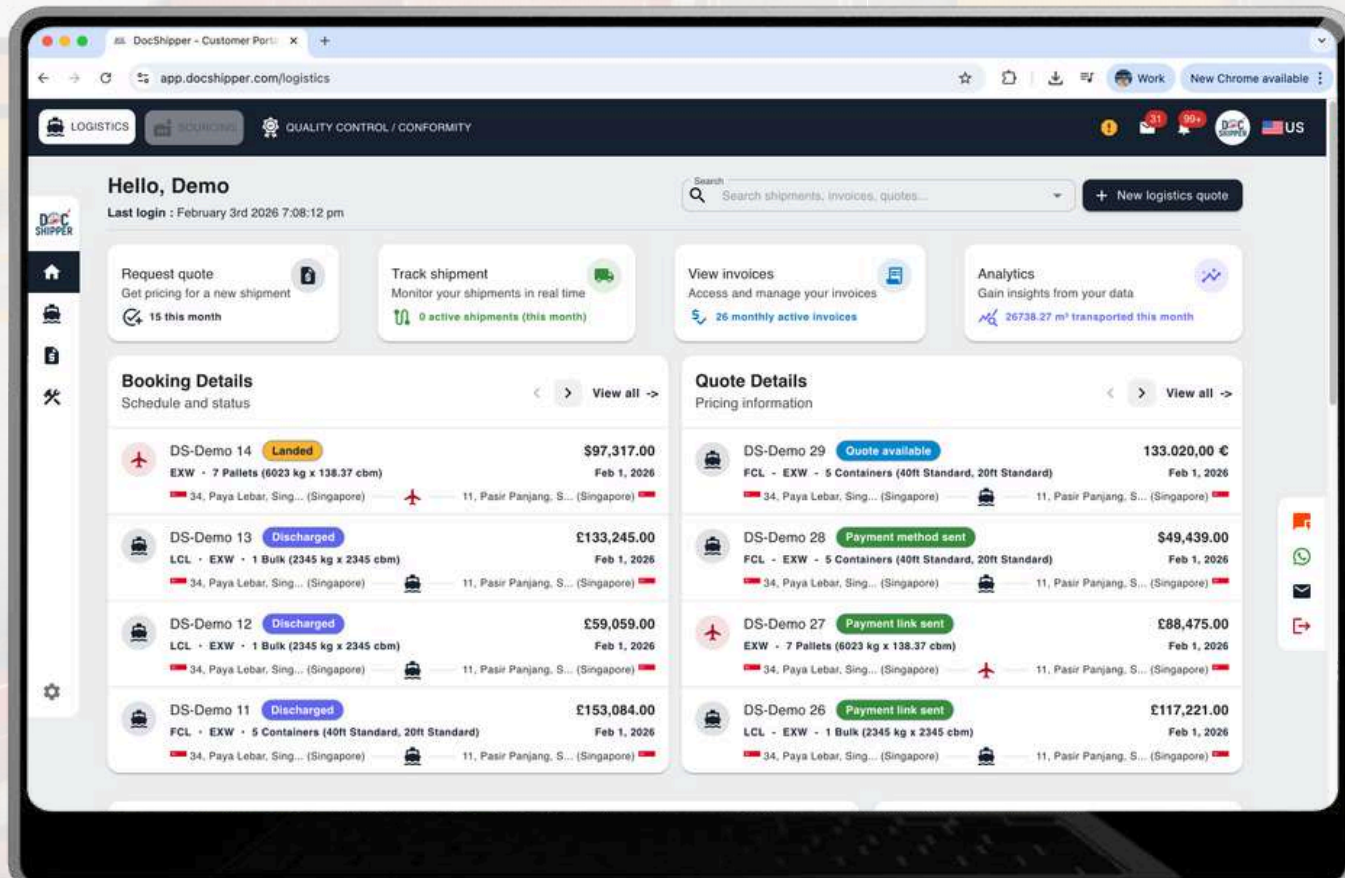

A smarter way to manage your supply chain

Our client platform is designed to become the **hub of your logistics operations**. It consolidates pricing, shipment tracking, operational monitoring and team collaboration into one streamlined interface — providing end-to-end visibility across your entire supply chain.

By centralizing data and workflows, the platform enables better coordination, faster execution and smarter decision-making. Whether you manage a few shipments or large-scale international flows, **everything you need is accessible in real time**, within a secure and intuitive environment.

Key capabilities include:

- Instant pricing requests and follow-up
- Real-time shipment tracking and milestones
- Centralized operational dashboards and performance insights
- Real-time tracking of air and ocean shipments

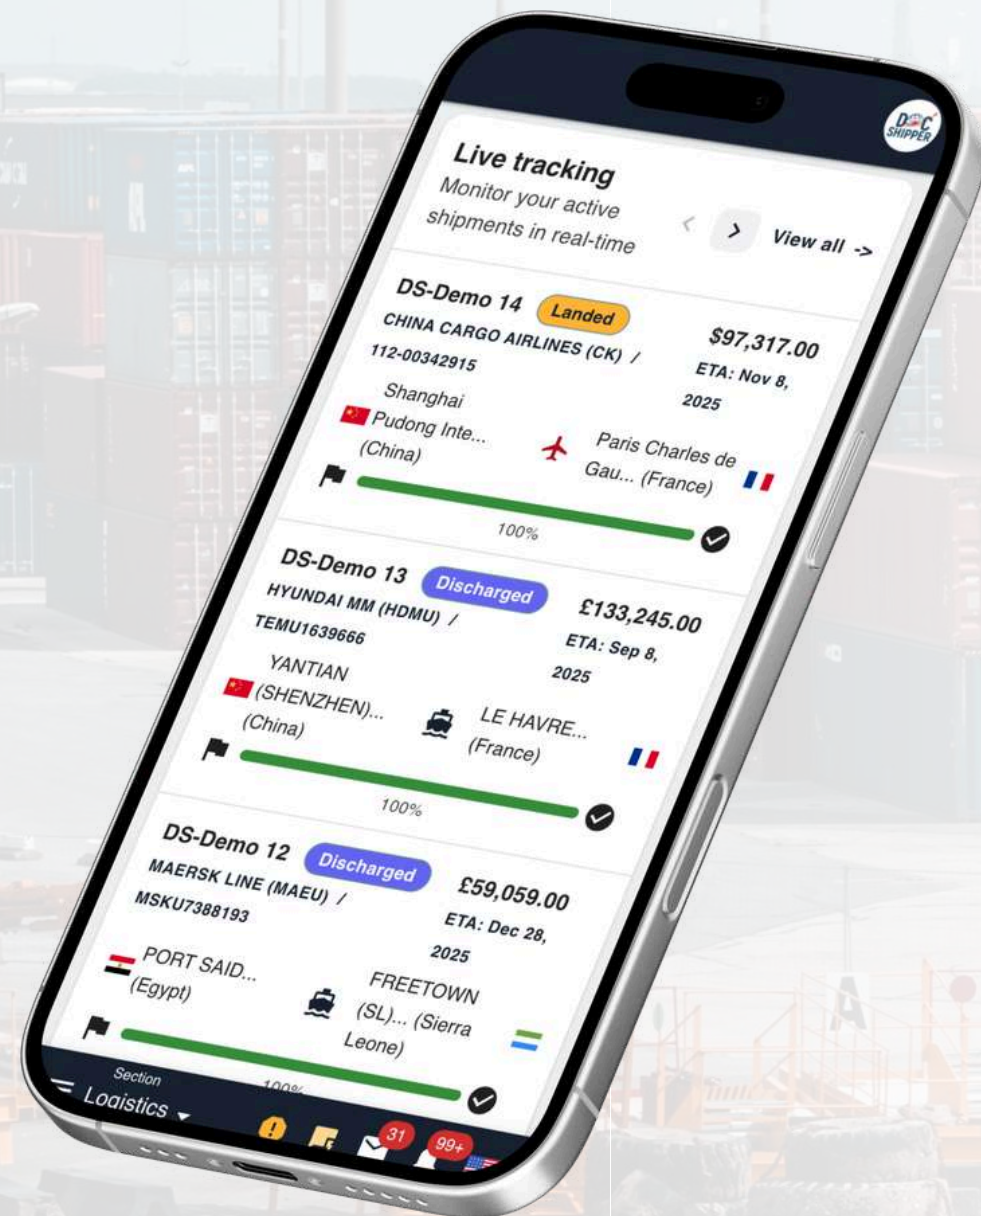

Scan to explore our platform

Your Operations at a Glance

All your logistics performance, clearly displayed in one place.

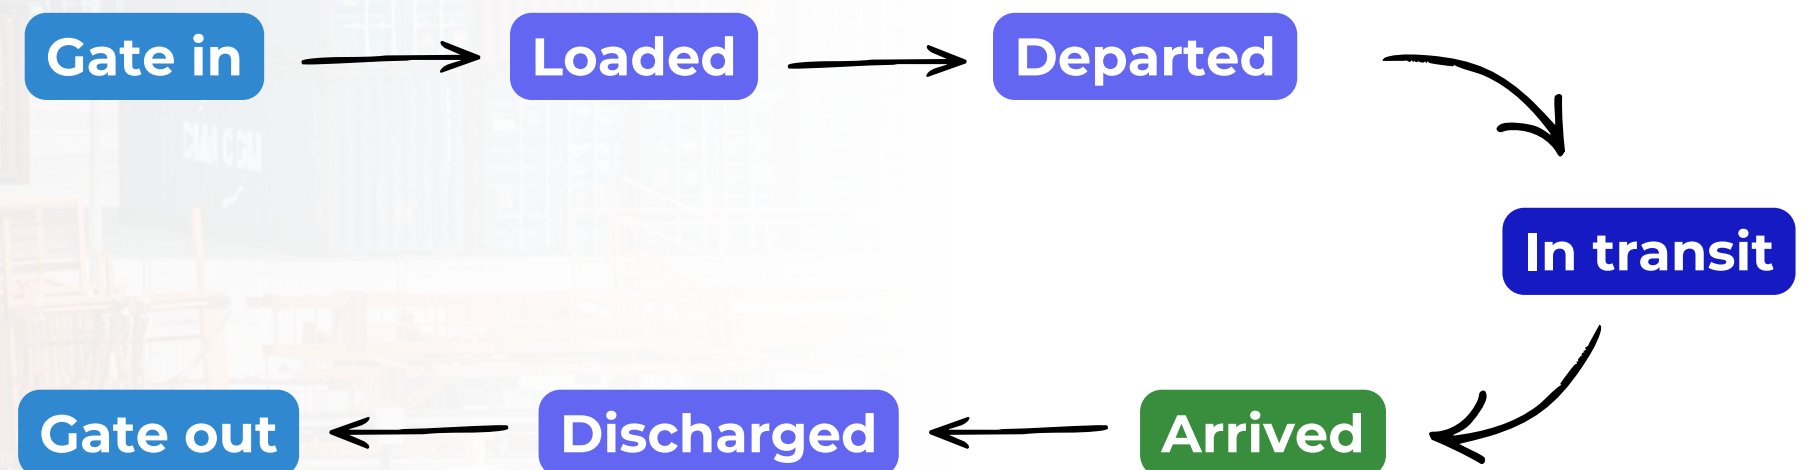

Access a centralized operations dashboard designed to give you a clear and structured overview of your logistics activities. **From active shipments to key performance indicators**, the dashboard helps you monitor ongoing operations, identify trends, and quickly understand what requires attention.

By consolidating operational data into a single interface, your teams can track performance, optimize workflows and make informed decisions with confidence.

Key capabilities include:

- Centralized KPIs and shipment overview
- Performance monitoring across your operations
- Faster, data-driven decision-making

Real-Time Shipment tracking

End-to-end visibility across every stage of your shipment.

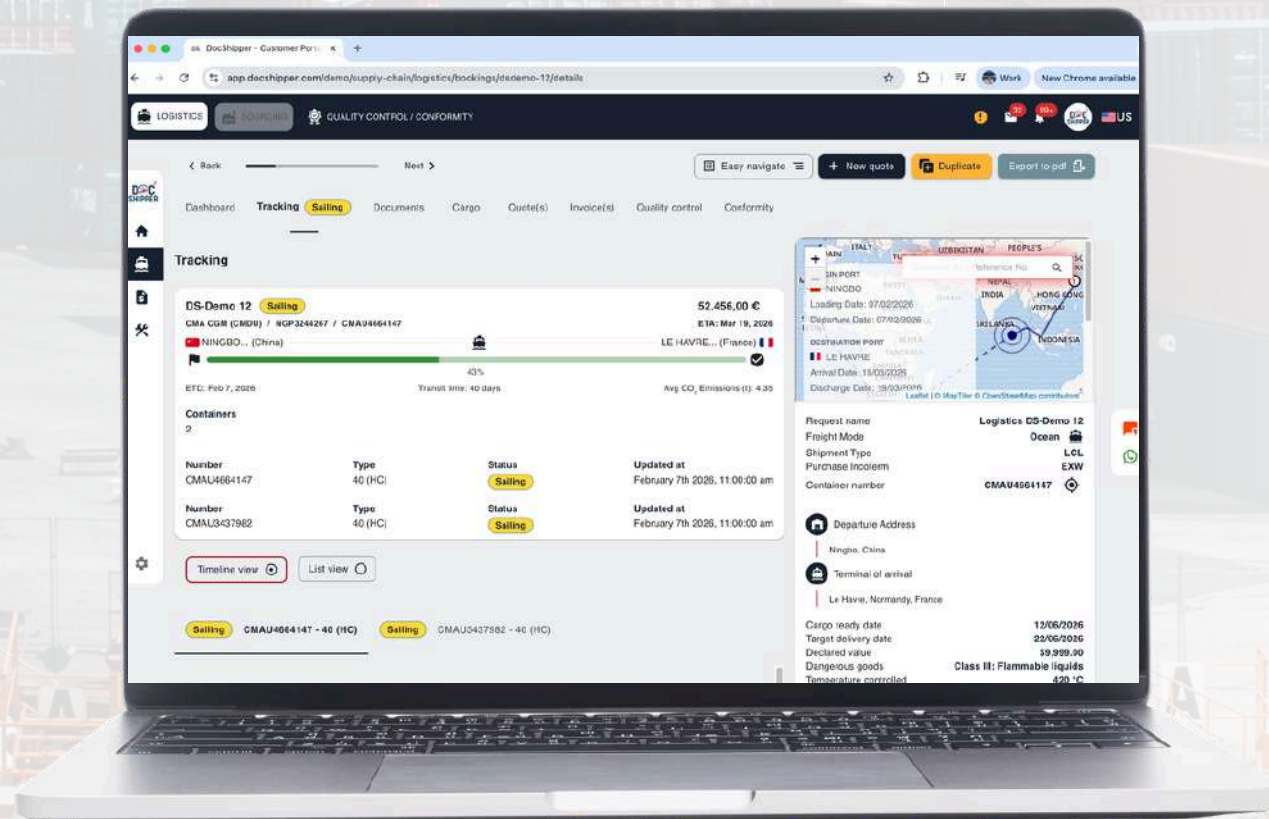

Designed for modern supply chains, our **real-time shipment tracking** gives you instant visibility over your logistics operations.

Monitor your cargo across every stage of transport, access critical updates as they happen, and rely on clear milestones to plan and manage your flows with confidence.

No more fragmented information — everything is consolidated in a single, reliable tracking environment.

Features include:

- Live shipment tracking across transport modes
- Key milestones, alerts and estimated arrival times
- End-to-end visibility, with no blind spots

SERVICES

Our Freight Services

At DocShipper, we bring the world closer by connecting your cargo to any destination, regardless of the mode of transport. Whether by air, sea, rail, or road, our expertise ensures your goods are always in good hands.

Looking for a cost-effective solution? Choose ocean freight consolidation (LCL), ideal for smaller shipments, or book your entire container (FCL)—flexible options tailored to your needs.

Is your cargo urgent? Opt for conventional air freight by booking space with airlines, or choose an express service with trusted carriers like DHL, FedEx, UPS, and TNT—perfect for time-sensitive shipments.

Additional Logistics Services

Warehousing

Reliable & flexible storage solutions, ensuring your goods are secure and accessible when needed.

Packing

Tailored packing solutions to protect your goods and ensure secure transport.

Cargo Insurance

Ensure your goods are protected with insurance against unforeseen risks.

Customs clearance

Fast and reliable import/export services to keep your goods moving seamlessly at customs.
